

Making a terrarium

PHOTO COURTESY OF TIANA

Written by Matthew

In science, the groups were using wildflower trees to make a terrarium. Just like humans, plants need food and water to grow. To make the terrarium, the children filled a plastic cup halfway with soil. Next, they used their finger to make a small hole in the soil. They filled the hole with wildflower seeds and then used a pipette to sprinkle drops of water on the seeds and soil. People, churches and the Bible help people grow with God.

Snacking while Learning
